

## Carolinan HealthCare System

Welcome to the Charlotte Pediatric Clinic weekend walk-in clinic at our Southpark location! We are available every Saturday and Sunday from 8:30am- 11:45am.

We are dedicated to providing excellent care to our patients with sudden, acute symptoms that cannot wait until our regular office hours to be seen.

Examples of symptoms that should be seen on the weekend include:

- Ear pain
- Sore throat
- Fever
- Symptoms of croup
- Cough with fever
- Congestion with fever
- Pain with urination
- Any breathing difficulty
- Wheezing
- Injuries
- Eye drainage or swollen eye
- Any sick infant
- Any other sudden, acute symptom

You will be seen on a first come, first serve basis by the next available physician rotating through our weekend clinic. Our clinical team will assess the reason for every appointment as they are scheduled. If we feel that one child's symptoms create a priority, you may find that we pull a child back to be seen who arrived after you.

If your child has any ongoing or recurring symptoms that are not sudden or acute, we ask that you use our regular office hours and see your pediatrician.

Thank you for giving us the opportunity to provide excellent care for your family.

Sincerely,

Charlotte Pediatric Clinic
