

AnMed Health Medical Center

AnMed Health has been an inseparable part of the Anderson, South Carolina community for more than a century. From its modest beginning as a 25-bed hospital, AnMed Health has evolved into one of the state's largest, not-for-profit health systems, with more than 35 patient care sites and nearly 3,500 employees. Today, AnMed Health serves an eight-county region and has an active medical staff of more than 300 physicians.

AnMed Health's major service lines include Heart and Vascular Care, Cancer Care, Women's and Children's Services, and a variety of diagnostic and surgical services. The health system is anchored by AnMed Health Medical Center, a 461-bed acute care hospital in downtown Anderson. AnMed Health also has a satellite North Campus which includes the AnMed Health Women's and Children's Hospital, the AnMed Health Rehabilitation Hospital, a comprehensive Cancer Center, physician offices and the Cardiac and Orthopaedic Center.

The Medical Center is home to AnMed Health Heart and Vascular Center, AnMed Health Neuroscience Center, a Level II Trauma Center and AnMed Health LifeFlight, an emergency helicopter service. A number of procedures are performed at the Medical Center, including open heart surgery, vascular surgery, total joint replacements and general surgery.

AnMed Health's efforts to lead the way in computerized physician order entry, medication reconciliation and digital imaging have made AnMed Health Medical Center a national demonstration site for General Electric. These initiatives are also just a few reasons AnMed Health was ranked among the 100 Most Wired hospitals and health systems by *Hospitals and Health Networks* magazine.

800 N. Fant St.
Anderson, SC 29621
