

Carolinas Medical Center-Pineville

CMC-Pineville maintains the honorable tradition of healing, caring and growing to meet the healthcare needs of southern Mecklenburg, York and Lancaster counties. Originally established in 1987, the hospital is currently undergoing a \$300 million expansion that will transform it into a full-service, tertiary care medical center in 2012.

Major projects in process or recently completed at CMC-Pineville include a 100,000-square-foot medical office building and a 335,000-square-foot expansion and renovation that will provide open-heart surgery and interventional cardiology, a 30-bed Intensive Care Unit, a Blumenthal Cancer Center satellite facility, radiation oncology therapy and inpatient kidney dialysis. We are also pleased to provide the Steele Creek community with a healthcare pavilion – CMC-Steele Creek – that houses an emergency department, diagnostic imaging, lab services and physician offices.

In addition to focusing on the health of local families, CMC-Pineville focuses on community outreach. We actively work to promote a healthy lifestyle by contributing to local organizations and schools and providing a range of special programs and health seminars. Our uncompromising excellence and commitment to care give our patients more of everything. We bring together people, technology and compassionate care for a lifetime. It's who we are at CMC-Pineville.
