WOMEN’S CENTER FOR PELVIC HEALTH

One-third of U.S. women experience pelvic health conditions that impact their day-to-day activities.

The Women’s Center for Pelvic Health offers a wide variety of innovative treatments for pelvic pain and other problems that can affect a woman’s quality of life. Our unique, multidisciplinary center is designed exclusively for the advanced gynecologic and urology needs of women.

DIAGNOSES AND TREATMENTS INCLUDE:

- Adenomyosis
- Advanced laparoscopic and robotic surgery
- Bowel disorders
- Chronic pelvic pain
- Cystoscopy
- Disorders of the ovaries
- Endometriosis
- Fecal incontinence
- Overactive bladder
- Painful periods
- Pelvic organ prolapse (fall of the bladder, rectum, bowel, uterus or vagina from normal position)
- Pelvic reconstructive surgery
- Sexual dysfunction
- Urinary incontinence
- Urinary or fecal fistula
- Urodynamic testing
- Uterine fibroids
- Voiding dysfunction
- Vulvovaginal conditions

There are many different ways to manage each of these conditions, including a wide variety of non-surgical treatment options. When surgery is necessary, our physicians specialize in minimally-invasive surgery using advanced technology; meaning accelerated healing and less scarring for the patient.
